Experience

BM Services - Full-Stack PHP Developer

Internship: Apr.-Jun. 2023 · Apprenticeship: Sep. 2023-Sep. 2024 · Full-time role: Sep. 2024-Jun. 2026

- Built custom modules and business features, optimized SQL queries, and resolved performance issues.
- Developed and maintained PHP e-commerce websites using WordPress/WooCommerce and PrestaShop.
- Managed production deployments, Linux servers, backups, and migrations.
- Worked with the agency's different teams to analyze client requirements.

Projects

GameSentry - Discord notification SaaS for Riot Games

Laravel, Inertia.js, React, TypeScript, Stripe

Application that automatically monitors League of Legends and Teamfight Tactics matches and posts summaries to Discord. Asynchronous processing with Laravel queues and scheduler, Riot, Discord, and Groq integrations, Free/Pro subscriptions, and an admin dashboard.

WhatsInMyBar - Community cocktail recipe platform

Symfony, API Platform, Nuxt, TypeScript, Docker, PostgreSQL

Application for discovering, searching, and publishing cocktail recipes. Monorepo architecture with a Symfony/API Platform API using JWT authentication and a Nuxt frontend. Docker-based development and CI with automated tests, static analysis, and code-quality checks.

Education

IUT Montpellier - Bachelor of Technology in Computer Science

Sep. 2021-Sep. 2024, Montpellier

Application Development track: design, development and validation (RACDV). Final year completed as an apprenticeship at BM Services.
